

## Sample JASA Article

Author One,<sup>1</sup> Author Two,<sup>1</sup> Author Three,<sup>1</sup> Author Four,<sup>2, a)</sup> and Author Five<sup>3, b)</sup>

<sup>1)</sup>*Department1, University1, City, State ZipCode, Country*

<sup>2)</sup>*Department2, University2, City, State ZipCode, Country*

<sup>3)</sup>*Department3, University3, City, State ZipCode, Country*

(Dated: 27 January 2021)

1 Put your abstract here. Abstracts are limited to 200 words for regular articles and  
2 100 words for Letters to the Editor. Please no personal pronouns, also please do not  
3 use the words “new” and/or “novel” in the abstract. An article usually includes an  
4 abstract, a concise summary of the work covered at length in the main body of the  
5 article.

<sup>b)</sup>Also at: Another University, City, State ZipCode, Country.

## I. INTRODUCTION

This sample document demonstrates the use of JASA in manuscripts prepared for submission to the Journal of the Acoustical Society of America.

See JASA-TeXGuide.pdf, which is part of this package, for extensive documentation on using commands for JASA.

You can compare the .tex version of this file with the resulting .pdf version to give you an idea of what commands are available and how they work. At the top of the .tex file you'll find a listing of the documentclass options, and an explanation of their results. Some additional suggestions are included in the body of this manuscript.

Beginner Latex users should refer to their favorite online documentation. A useful place to start is the primer from the TeX Users Group <https://www.tug.org/twg/mactex/tutorials/ltxprimer-1.0.pdf>

## II. TRACK CHANGES

ASA prefers that the Track Changes commands only be used to track revisions.

### A. Using track changes commands

Track changes commands will work only when the option `trackchanges` is used, ie:

```
\documentclass[preprint,trackchanges]{JASA},
```

and only when the 'preprint' option has been used.

24 Using the option ‘trackchanges’ to the ‘preprint’ documentclass  
 25 (`\documentclass[preprint,trackchanges]{JASA}`)  
 26 activates the commands, `\added{}`, `\deleted{}` and `\replaced{}{}` to mark changes that  
 27 we’ve made.

## 28 **B. Available track changes commands**

29 To add words, `\added{<word added>}`  
 30 To delete words, `\deleted{<word deleted>}`  
 31 To replace words, `\replace{<word to be replaced>}{<replacement word>}`  
 32 To explain why change was made: `\explain{<explanation>}`

## 33 **C. Available option for track changes commands**

34 Comments can be used for additional information to the author, perhaps a date, or the  
 35 editor’s initials, or more text.

36 To add comment when adding words, `\added[comment]{<word added>}`  
 37 To delete words, `\deleted[comment]{<word deleted>}`  
 38 To replace words, `\replace[comment]{<word to be replaced>}{<replacement word>}`  
 39 To explain why change was made: `\explain[comment]{<explanation>}`

#### D. How to embed a citation in `\replace{}{}`

Here's how to embed citations within `\replaced{}{}`:

```
\replaced{\hbox{\citep{xyz}}{\hbox{\citep{zyx}}}.
```

ie,

```
\replaced{\hbox{\citep{booksamp1}}}{\hbox{\citep{joursamp1}}}
```

#### E. End of document, 'list of changes'

At the end of the document, use `\listofchanges` is called by `\end{document}`. It will list the changes and the page and line number where the change was made.

When final version, `\listofchanges` will not produce anything, `\added{}` word will be printed, `\deleted{}` will take away the word, `\replaced{}{}` will print only the 2nd argument. `\explain{}` will not print anything.

#### F. Samples of track changes

This shows 'added': (Added: This was added to the text)

Here is an example of deleted in the body of a paragraph. (Deleted: This was deleted from the text)

We replaced (Replaced: XYZ replaced with: ZYX)

At the end of the document, use `\listofchanges` is called by `\end{document}`. It will list the changes and the page and line number where the change was made.

←  
Redundant  
sentence,  
better  
without  
it. Do  
you  
mind?  
– JC

58 If ‘trackchanges’ is not an option, `\listofchanges` will not produce anything. `\added{xyz}`  
 59 will put ‘xyz’ in the text; `\delete{zzz}` will produce nothing; and `\replace{abc}{def}`  
 60 will leave ‘def’ in your text.

### 61 **G. Add comment for the change?**

62 If you want to add a name to identify who made the change, or any other comment, you  
 63 can use `[]` to enter a comment, i.e.,

64 `\added[Amy, Sept 14, 2019]`

65 `{This was added to the text}`.

66 `([Amy, Sept 14, 2019] Added: This was added to the text)`

67 `([Not really necessary] Deleted: This was deleted from the text)`

68 We replaced `([(written backwards originally)] Replaced: XYZ replaced with: ZYX)`

## 69 **III. CONCLUSION**

70 And in conclusion...
